03:PLATO

Plato is the flagship of multi-functional signage. The attractive designs fit perfectly into small and larger concepts, be they office information signs or larger signs for directions. Plato also offers the flexibility for you to alter signage information yourself at a moment's notice. Plato is easy to install and brings years of usage.

The benchmark of house signage, Alu-Sign have come up with a timeless design incorporating a clear, curved anodised frame with transparent anti-reflex PVC cover that can be removed with a suction cap. Supplied with designer screws for wall mounting when necessary. No need to remove the tabs.

STANDARD SIZES

The comprehensive range of profiles runs from 90, 120, 150, 210 to 300 mm. They can be suspended, wall mounted, or be used as stand alone desk signage, single or double-sided. Plato allows you to formulate your own inlay text on your computer and thus alter it as often as you wish.

As with all Alu-Sign products, we carry a permanent stock of Plato that is available in mill finish, anodised or power coated. For wall mounting using double-sided tape there is a lighter version whose maximum size is 224 mm.

Design and functionality in one

03:PLATO+

The icing on the Plato cake... for those people who want to add that touch of class to their signage. A simple click and your frames are fixed. Eye-catching desk or wall signage with the freedom to choose the lettering and printing yourself, print it out and slide it into the aluminium frame. The signage is equally at home as a wall mounting, using either double-sided tape or screws.

The 'must have' for your wall signage with aluminium profiles and a transparent acryl cover, that can be removed with a suction cap, ranging from 75 through 105, 150, 210 to 300 mm. This contemporary and attractive model can be fitted both vertically and horizontally on any wall with the added benefit that all the sections click together. Once affixed to the wall there's no need to remove the end caps to alter your message. As with all Alu-Sign products, innovation and flexibility rule.
